ABSTRACT

10 A phospholipidic composition with an L- α -
glycerophosphatidyl-choline concentration of at least 10 %
by weight is described, where said composition is granular
and also contains, in addition to L- α -
glycerophosphatidylcholine, at least one granulation aid
15 selected from the group consisting of a monophosphate,
diphosphate or triphosphate of an alkali metal or an
alkaline earth metal or a mixture thereof.
